We are a member of **GAIA-X Association**

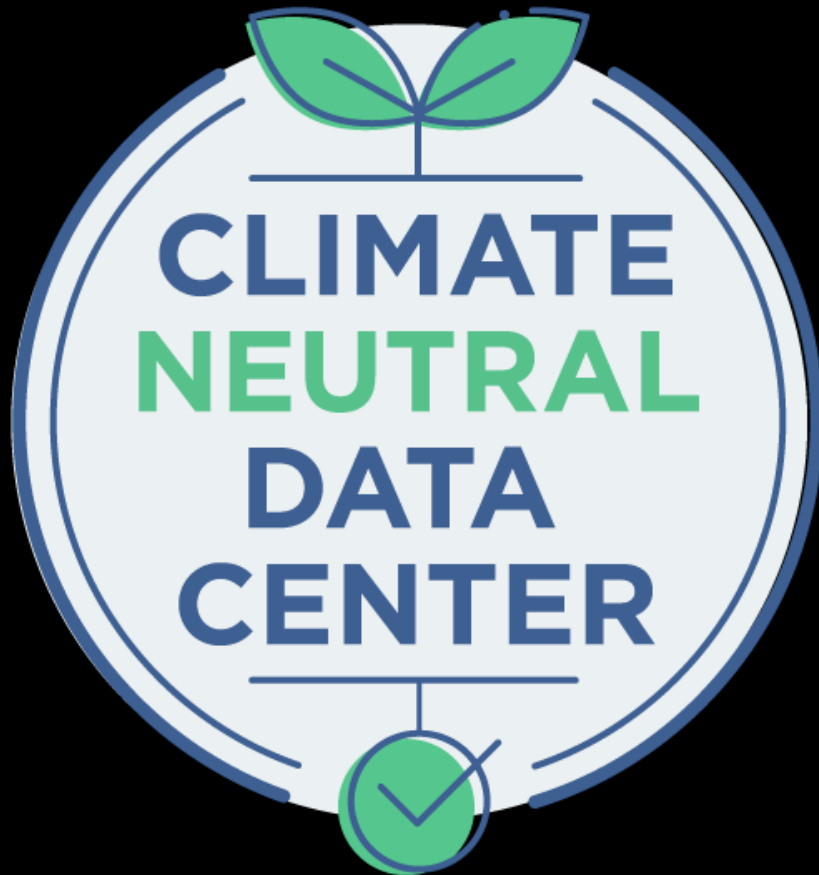

GAIA-X is an European providers project to develop an competitive and trusted federation of data infrastructures and service providers for Europe. The project is supported by representatives of business, science and administration from Germany and France, together with other European partners.

Cloud Community Europe Polska helps to position our members in international consortia to create sectorial data spaces for finance, industries, gaming, health, energy sector, agribusiness, e-commerce and others .

GAIA-X AISBL Association in Brussels was established to develop a Gaia-X project ,manage cooperation with the European Commission,

We are a partner of

CLIMATE NEUTRAL DATA CENTER PACT

On January 21, 2021, 25 e-companies and 17 European associations, among them **Cloud Community Europe Polska**, signed an agreement with the **European Commission** to support efficient energy and climate-neutral solutions for computing infrastructure.

The idea of climate-neutral data centers is in line with the **EU's Green Deal policy**, a strategy that aims to transform the EU into a resource-efficient and competitive economy with net-zero greenhouse gas emissions.

The entities joining the Pact represent the most significant players in the cloud infrastructure and data center industry in Europe. The signatories of the pact have assumed obligations to implement solutions favorable to environmental protection in the provision of cloud services, ensuring energy efficiency, purchase of 100% carbon dioxide-free energy, prioritization of water protection, server reuse and repair and heat recovery.

A close-up photograph of two hands shaking, symbolizing a partnership or agreement. In the background, a network diagram is visible, consisting of a central blue dot connected to several other dots by thin white lines, all set against a textured, brownish surface.
